

LIGHT GRAFF.

DIGITAL GRAFFITI WALL

Light Graff is an installation made up of a video screen and a specific multifunctional tool : the virtual spray paint can.

The spray allows the user to paint and select different types of patterns, to change the size or color, all directly by interfacing on the screen.

GENERAL INFORMATIONS

Required equipment : 1 computer, 1 screen projection, 1 digital graffiti can, 1 printer.
Number of participants : 10 people for 1 hour of animation
Necessary area : Xm2

FUNCTIONNEMENT

Light Graff is an installation that invites participants to come scratch on an interactive canvas. Just press the button on the digital graffiti paint can and a spray of rich color appears.

Fast and precise, the device offers sensations of real with the infinite possibilities of digital technology. The output result is a high resolution digital image, available for printing.
